ABOUT ME

I am a Web-Developer with deep understanding of HTML, CSS, and JavaScript. My journey in web development began while selling goods online, leading me to pursue structured learning of Web-Designing from Sugyanam Institute of Education in Ajmer and a Full-Stack course from Udemy.

I have successfully designed several responsive projects, showcasing my skills and passion for technology. Currently, I am learning Front-End library – React.JS at Tops Technologies – Ahmedabad.

PROJECT EXPERIENCE

FULL-FLEDGED BED-N-SOFA E-COMMERCE – “Finesse” with ADMIN, SELLER, and BUYER Dashboards

LIVE :

GIT : <https://github.com/Prdp-ktri/Furniture-Marketplace-bed-n-sofa>

Technologies Used : CSS, SCSS, ReactJS, JSON-Server, NodeJS, NPM, GitHub

Key Features :

• Role-Based Dashboards

Separate dashboards/interfaces for buyers, sellers, and admin, each with tailored functionality. Register / login flows, protected routes depending on role

• Product Management (Seller-Side)

Sellers can add, edit, delete products (beds, sofas, etc.), upload images, set price, stock. Buyers can view a catalog of products, with filters, search, sorting, pagination.

• Admin Control / Moderation

Admin can manage users (approve/reject sellers, block users), manage all products, view all orders, perhaps analytics.

- **Mock Backend with JSON-Server**

Sellers can add, edit, delete products (beds, sofas, etc.), upload images, set price, stock.

- **Basic Validations & Error-Handling.**

Input validation (forms), error messages for network failures, fallback UI states. Role-based route protection, token storage and route guards.

Booking.com Clone with ReactJS

LIVE : <https://booking-frontend-i0lp.onrender.com>

GIT : <https://github.com/Prdp-ktri/LandingPageWithTailwind>

Technologies Used : HTML, CSS, ReactJS, NodeJS, ExpressJS, NPM, and JSON

Key Features :

- **Frontend Development with ReactJS**

Built a dynamic and responsive user interface replicating the Booking.com homepage.

- **Backend Integration with Node.js/Express**

Implemented a lightweight server (server.js) to serve the React application and handle routes.

- **User Data Handling with JSON**

IUsed Users.json file to simulate user data storage and retrieval for demo purposes.

- **UI/UX Cloning Practice**

Recreated core layout, design, and interactions of Booking.com to strengthen skills in responsive design and component-based architecture.

ADANI REAL ESTATE

LIVE : <https://adani-real-estate.onrender.com>

GIT : <https://github.com/Prdp-ktri/LandingPageWithTailwind>

Technologies Used : HTML5, CSS3, JavaScript, TailwindCSS, PostCSS, ReactJS, Vite, NodeJS, and ExpressJS

Key Features :

- **Modern UI with Tailwind CSS**

Built entirely with Tailwind CSS, ensuring clean, responsive, and utility-first styling. Easily customizable design for quick branding and visual tweaks.

- **React + Vite Integration**

Utilizes Vite for blazing-fast development and builds. Structured using React components for reusability and scalability.

- **Responsive Design with smooth scroll & navigation**

Fully responsive layout optimized for mobile, tablet, and desktop devices.. Ensures seamless user experience across screen sizes. Interactive navbar with smooth scrolling to sections. Enhances user experience with fluid navigation.

MOVIE REVIEW APP

LIVE : <https://movie-review-app-xsyj.onrender.com>

GIT : <https://github.com/Prdp-ktri/Movie-Review-App>

Technologies Used : HTML5, CSS3, JavaScript, ReactJS, Vite, NodeJS, ExpressJS, MongoDB, and Mongoose

Key Features :

- **Add Movie Reviews**

Users can submit a review for a movie, including: Movie Title, Review Text, Rating 1 to 5, Reviewer's Name, and the movie cover or poster.

- **Image Upload Support**

Users can upload an image with each review. Images are stored on the server and displayed alongside the review. Uses Multer middleware for handling image uploads on the backend.

- **Edit Reviews**

Users can update existing reviews through an edit form. Fields such as title, review text, rating, and image can be changed.

- **Delete Reviews**

Reviews can be removed with a delete button.

- **MongoDB Integration**

Reviews are stored persistently using MongoDB via Mongoose. Each review is stored as a document in the database.

SKILLS

- | | | |
|---------------------------|-------------------------------|---------------------|
| • HTML5, CSS3, JavaScript | • Bootstrap, Tailwind, jQuery | |
| • ReactJS | • Node Package Manager(NPM) | • MongoDB, Mongoose |
